

# TIPS AND TRICKS FOR THE BEST RECIPE REPRODUCTION

**If you are not 'tech savy' that is okay and I am here to help!  
Dont stress about understanding image dimensions, editing software, file types and all of that, just follow these easy steps**

## **How to take a picture using your phone:**

- Watch YouTube tutorials on which setting to use on your specific phone
- Clean your lense from fingerprints and dust
- If possible, take photo outside on an overcast day for even lighting
- If taking photo inside, be mindful of shadows - good lighting is important
- Make sure recipe is in focus and words are not blurry. Tap the phone screen where you want to focus
- Avoid using the digital zoom function, instead physically move closer
- Frame image as close as possible without chopping off any of the recipe
- Make sure image is square as to not distort recipe
- Take a few pictures and choose the best image

## **How to scan:**

- Make sure scanning bed is clean and free from dust
- Set scanner on colour with a resolution of 300 dpi
- Any file format is fine: PDF, PNG. JPEG ect

**Next step is to upload your recipe  
and let the magic begin!**
